## TÜM ODA VE BORSALARA (Genel Sekreterlik)

İlgi : Sanayi ve Teknoloji Bakanlığı'nın 11.01.2022 tarih ve 3247793 sayılı yazısı.

İlgi yazıda, Rusya Federasyonu'nun (RF), Türk yatırımcılarını, Kuzey-Güney Ulaşım Koridoru (INSTC) ile Büyük İpek Yolu'nun kuzey bölümünün kesiştiği noktada yer alan, Hazar Denizi kıyısında ve etrafındaki 1000 kilometre çapındaki alanda, 300 milyondan fazla nüfusa sahip 8 ülkenin bulunduğu Astrakhan Bölgesi'nde yatırım yapmaya davet ettiği belirtilmektedir.

Söz konusu bölgede bulunan Lotus Tipi Endüstriyel Üretim Özel Ekonomik Bölgesi (SEZ Lotus) ve Liman Özel Ekonomik Bölgesi'nin (Port SEZ), RF Hükümeti'nin 18 Kasım 2014 tarihli ve 1214 sayılı Kararnamesi uyarınca kurulmuş ve halihazırda 16 kiracı firma faaliyet göstermekte olduğu, mühendislik altyapısı, yollar ve bölge gelişimi ile ilgili çalışmaların devam ettiği ifade edilmektedir.

Astrakhan Bölgesi'nin, Rusya'da, Hazar Denizi, Hindistan, Güneydoğu Asya ve Orta Doğu ülkelerinin pazarlarına erişimi olan tek özel ekonomik bölge haline getirilmesi planlanmaktadır. INSTC'nin söz konusu bölgelerden Avrupa'ya nakliyatın gerçekleştirilmesi anlamında, en kısa ve ekonomik rota olduğu, örneğin Süveyş Kanalı'ndan geçen rotaya göre, yarıdan fazla zaman ile, %30 oranında maliyet tasarrufu sağladığı belirtilmektedir. Kiracı firmaların, tipik olarak bir limanda yapılan mal depolama; gemilerin temini ve teçhizatı; açık deniz, nehir gemileri ve diğer bileşenlerin üretimi, onarımı, bakımı, modernizasyonu; su biyolojik kaynaklarının işlenmesi; malların satışa ve nakliye hazırlanması işlemleri (paketleme, ayırma, yeniden paketleme, parti bölme, işaretleme ve benzeri işlemler); basit montaj ve diğer işlemler; mal takası; malların toptan ticareti; liman özel ekonomik bölge altyapısının işleyişinin sağlanması ve liman özel ekonomik bölge faaliyet sözleşmesine göre üretim faaliyeti gerçekleştirebileceği belirtilmektedir. Diğer taraftan, Özel Ekonomik Bölgeleri'nin kiracılarına, vergi ve gümrük imtiyazları (Rusya Federasyonu yasalarına göre); kamu hizmeti altyapısına ücretsiz bağlantı; ticari faaliyetlerde idari engelleri aşan bir "tek durak noktası" sistemi; güçlü lojistik olanaklar (demiryolu, karayolu ve gemi taşımacılığı); tercihli arsa kiralama koşulları, arsa üzerindeki gayrimenkul inşaatı tamamlandıktan sonra arsa satın alma imkanı sağlandığı bilgisi de verilmektedir.

SEZ Lotus ve Port SEZ kiracısının yapabileceği liman faaliyetleri, kiracı olma koşulları ve bölgenin tanıtımı ile ilgili çeşitli görsel materyallerle desteklenen detaylı bilgi ekteki broşürde sunulmakta olup; ayrıca, daha ayrıntılı bilgi edinmek için [www.sezlotos.ru](http://www.sezlotos.ru) internet adresinin ziyaret edilebilir veya [lotos@sezlotos.ru](mailto:lotos@sezlotos.ru) e-posta adresinden iletişim kurulabilir.

Bilgilerini ve konunun üyelerinize duyurulmasını rica ederim.

Saygılarımla,

*e-imza*

INSTC is the main route for transportation of cargoes from India, Southeast Asia, Africa and the Middle East to Europe and back, bypassing the Suez Canal

# Prospects for the development of cargo transportation on the International North-South Transport Corridor. Intersection of the INSTC and the route from China to southern Europe.

DECREE OF THE GOVERNMENT OF THE RUSSIAN FEDERATION of  
November 7, 2020 No. 1792 **“On the creation of a port special economic zone  
and the Caspian Cluster on the territory of the Astrakhan Region”**

A PORT SPECIAL ECONOMIC ZONE TENANT HAS THE RIGHT TO CARRY OUT PORT ACTIVITIES AND (OR) CONSTRUCTION, RECONSTRUCTION AND OPERATION OF PORT INFRASTRUCTURE FACILITIES

The port activity is the following activity performed in a port:

- ⦿ goods warehousing, storage and other service typically rendered in a sea port, river port, airport according to the international contracts of the Russian Federation and the Russian Federation legislation;
- ⦿ provision (including with marine stores, board supplies) and equipment of vessels, aircraft;
- ⦿ production, repair, maintenance, modernization of sea-going, river and aircraft, aerotechnics, including aviation engines and other components;
- ⦿ water biological resources processing;
- ⦿ preparation operations of goods for sale and transportation (packing, sorting, repacking, lot dividing, marking and similar operations);
- ⦿ simple assembly and other operations, execution of which does not considerably change goods condition according to the list approved by the Russian Federation Government;
- ⦿ exchange trade in goods;
- ⦿ wholesale trade in goods;
- ⦿ provision of port special economic zone infrastructure facilities functioning;
- ⦿ production activity according to the port special economic zone activity agreement.

## TAX CONCESSIONS

АО «ЛОТОС»  
Астрахань  
Российская Федерация

Уважаемый господин Милушкин,

мы с большим интересом изучили Вашу концепцию развития международного транспортного коридора «Север-Юг». В частности, речь идет об оптимизированных и более быстрых отправлениях в и из Индии.

В Европейском Союзе Германия является самым важным торговым партнером Индии и шестым по значимости в мире. С объемом обработки 240 000 TEU в год, эта южно-азиатская страна входит в десятку самых важных торговых партнеров Гамбурга с растущей тенденцией. Основными импортными товарами из Индии являются химические продукты, металлы и металлические изделия, а также текстиль, одежда, кожа и кожгалантерея. Наиболее важными экспортными товарами, отправляемыми через порт Гамбурга в Индию, являются машины, оборудование и бытовая техника, металлы и изделия из металла, а также химические продукты. Ежедневно, в Гамбург прибывают три полных контейнерных лайнера из Индии. Кроме того, Гамбург также является важным перевалочным пунктом для генеральных грузов и вместе с многочисленными крупногабаритными судоходными компаниями образует важный порт для генеральных грузов, тяжелых грузов и перевозок типа RoRo.

С 2011 года Порт Гамбурга имеет Представительство в самом важном портовом городе Индии Мумбае, тем самым подтверждая, что мы настроены на позитивное развитие экономических отношений с Индией. Ввиду этого факта мы также заинтересованы в доставке товаров из и в Гамбург по новым транспортным коридорам.

Мы приветствуем Вашу идею о расширении коридора «Север-Юг» до стартового и финишного узлов Гамбурга и будем рады возможности для дальнейших обсуждений и дискуссий.

С наилучшими пожеланиями

## **Special economic zone of industrial production type Lotus (SEZ Lotus) and a port special economic zone (port SEZ)**

SEZ Lotus and a port SEZ are located in the Astrakhan region at the intersection of the International North-South Transport Corridor (the INSTC) and the north part of the Great Silk Way. The Astrakhan region has borders with the countries of the Caspian Sea. There are 8 states within a radius of 1000 km from the Astrakhan region with a total population of more than 300 million people.

Such advantageous geopolitical location of SEZ Lotus and a port SEZ makes them the only special economic zones in Russia that have access to the markets of the countries of the Caspian Sea, India, the countries of Southeast Asia and the Middle East. Under the conditions of an active development of the International North-South Transport Corridor, implementation of a project on the territory of special economic zone in the Astrakhan region is the best solution for a company, planning to enter this market.

The INSTC that runs through the Caspian Sea and the Astrakhan region, is the shortest and the most cost-effective route for cargo deliveries from India, Southeast Asia, Africa and Middle Eastern countries to Europe and back. The main advantages of the INSTC compared to other routes, in particular over the route running through the Suez Canal, are distance reduction by more than half, time saving for container cargos transportation from 37 to 15-17 days, and 30% reduction of transportation costs.

Industrial production special economic zone Lotus (SEZ Lotus) was established in the Astrakhan region according to the Decree of the Government of the Russian Federation №1214 of November 18, 2014. Currently, in SEZ Lotus there are 16 tenants with more than 30 billion rubles of the declared investments, including companies from Russia, Italy, Azerbaijan and Iran. Tenants are provided with engineering infrastructure, the roads are being built, development of the territory continues.

According to the set of measures for the development of the INSTC transit potential on November 7, 2020 the Decree of the Government of the Russian Federation on the creation of a port special economic zone in the Astrakhan region, which will be united with the industrial-production SEZ Lotus into the Caspian Cluster, was launched. Construction of a new port and logistics complex with a modern container terminal will be the anchor project.

SEZ Lotus tenants can carry out various types of industrial and production activities. It is possible to establish enterprises of five hazard classes. An additional advantage is the proximity to the markets of shipbuilding and the oil and gas industry - oil and gas companies are implementing their long-term projects in the Astrakhan region and on the shelf of the Caspian Sea; large and medium-sized shipbuilding

enterprises (including divisions of the United Shipbuilding Corporation) operate in the region.

Considering the political and economic situations, the most promising industries for arranging production on the territory of SEZ Lotus are shipbuilding, production of equipment and components for oil and gas industry, chemical industry, food processing industry, pharmaceutical and other high-technology industries. The industries are determined on the basis of considerable level of recourses in the Astrakhan region and in the Southern Federal District. JSC SEZ Lotus provides the tenants with the needed amount of such resources as water, gas, electricity.

A tenant of a port SEZ may carry out the following port activities:

- goods warehousing, storage and other service typically rendered in a port;
- provision and equipment of vessels;
- production, repair, maintenance, modernization of sea-going, river vessels and other components;
- water biological resources processing;
- preparation operations of goods for sale and transportation (packing, sorting, repacking, lot dividing, marking and similar operations);
- simple assembly and other operations, execution of which does not considerably change goods condition according to the list approved by the Russian Federation Government;
- exchange trade in goods;
- wholesale trade in goods;
- provision of port special economic zone infrastructure object functioning;
- production activity according to the port special economic zone activity agreement.

Tenants of special economic zones would have the following preferences:

- tax and customs concessions (according to the laws of the Russian Federation);
- free connection to utility infrastructure;
- a “one-stop shop” system breaking administrative barriers in business operations;
- powerful logistic capabilities (rail, road and ship transport);
- preferential land lease terms, possibility to buy a land plot upon completing the construction of the real estate item on the land plot.

The project of an industrial production special economic zone tenant should provide at least 120 million rubles investment in his own production and this amount contains such expenses as construction of industrial facilities, equipment costs and other operating expenses necessary for commencement of works. The project of a port special economic zone tenant should provide at least 400 million rubles investment for the construction of the port infrastructure and at least 120 million rubles for the reconstruction of the port infrastructure.

To obtain a tenant status, a business plan must be developed. After a successful presentation of the business plan the company concludes an agreement on industrial production activity with the Government of the Astrakhan region and JSC SEZ Lotus. Within three years of the date of conclusion of the agreement on carrying out activity a tenant is obliged to make capital investments in the amount not less than of forty million rubles. The tenant status is valid until the year 2063 for SEZ Lotus tenants (until the year 2069 for the port SEZ tenants).

More information about the advantages of establishing an investment project on the territory of SEZ Lotus and the port SEZ you can get by visiting the official website [www.sezlotos.ru](http://www.sezlotos.ru)

Taking into account the governmental support from the Russian Federation and the Astrakhan Region for creating SEZ Lotus and the port SEZ, active development of the INSTC, broad economic relationships with neighboring states, as well as a lot of preferences for business, we would like to invite you to become a tenant of our special economic zones and implement your project.
